Mission Statement

With a strong customer focus we aim to provide our customers with quality, on-time and on-budget solutions. With our extensive experience we understand what it takes to deliver a quality solution for your business!

Company Overview

Black & Hayden Consulting (BHC) is a small Web Services and Consulting business based in West Gosford, NSW. BHC provides professional and affordable solutions to a wide variety of businesses throughout Sydney. Specializing in J2EE Consulting, website development, hosting and support to businesses of all sizes, BHC work towards creating an efficient and effective IT solution for your business.

Business partners Daniel & Ben founded BHC after 7 years honing their Web & Consulting skills with employers such as IBM GSA, BHP & Sony Music. As well as corporate experience they also have experience dealing with medium and small businesses; both enjoying stints with such smaller firms as Multitask Consulting and Metiom. Along with their industry experience both have completed Tertiary Studies at The University Of Newcastle, Ben with a double Computer Science/Math degree and Daniel completing a Bachelor of Information Science.

In 2006 BHC welcomed Adrian Lee to the team. Adrian is a highly qualified analyst programmer with global experience. In his short time at BHC he has been involved with various technologies including Websphere Commerce, Hibernate, Lucene and Spring; and has been an integral part of such projects as Westfield and Booktopia.

Ben McDarmont is another member of the BHC team. Ben graduated from the University of Newcastle with a degree in Applied Information Technology and is honing his skills in such areas as web development, graphic design and DHTML. His contributions include: www.kincumberindoorsports.com.au , www.shannondandphotography.com.au & www.hotpotato.com.au .

Cameron Duff is the newest member of our team. Cameron is a Java Developer and joined our team in early 2008. Cameron has helped to enhance a number of our J2EE systems and has been heavily involved in the development of Hot Potato and our E-Commerce infrastructure.
